

Bulletin – Moldova. Suspended Service

Skynet has decided to suspend our service to Moldova with immediate effect.

We have shipments in our hub awaiting uplift and the expected service has not resumed therefore we will return these to you in due course.

The full list of shipments will be notified to you by your Account Manager in due course.

We will confirm to you by bulletin and on our website when our service resumes.

We thank you for your patience and hope our friends/family and colleagues are able to stay safe.
